Assignment 1:

Last time of submission: 26 April 4pm

Create a simple web application named "Expense Manager" where you need to implement below features:

1. Insert below data from a HTML form into a Database:
   a)   Expense Category (There should be a drop-down/combo box) as example Transportation, Food, Fees, Bills, Entertainment etc
   b)   Date (There should be a date picker)
   c)   Expense Name
   d)   Description
   e)   Amount

2. Show all these data in a separate JSP page, data needs to sorted by Date.
